

Product Data Sheet

Vaseline Oil

Means applied for lubrication of machine parts and precise mechanisms in automotive, textile and telecommunication industry. Non-staining, odour-free, colourless, neutral in contact with plastics. Reduces friction, preserves the components exposed to weather conditions and prevents plastic or rubber components from adhesion to moulds.

Designed for:

- ◆ preparation reduces and diminishes friction
- ◆ lubrication of machines and all precise mechanisms
- ◆ efficiently eliminates squeaks and grinds
- ◆ facilitates sliding

Application:

- preparation reduces and diminishes friction,
- ideal for lubrication of machines, devices and all precise mechanisms,
- efficiently eliminates squeaks and grinds, facilitates sliding,
- protects and preserves rubber and plastic

Package:

Capacity	Package	Symbol
50 ml (oiler)	20	AGT-017
100 ml (oiler)	20	AGT-018
300 ml (aerosol)	40	AGT-019
1000 ml (bottle)	18	AGT-099
